YOU SUPPORT AND WE EXPORT

ABOUT US

Direction Chemicals offers comprehensive chemical distribution and manufacturing solutions to an array of industry verticals across the globe. We leverage our decades of experience in the industry, combined with unrivalled technical and marketing knowhow, to deliver value across the supply chain. Our first-hand understanding of the industry helps us customize our solutions to perfectly cater to customer needs. Not surprisingly, we are at the leading edge of innovation and excellence.

Our India operations focus on centralized procurement, contract, R&D and supply chain management. This end-to-end capability translates into efficient and cost-effective solutions. Today, we are one of India's leading players in export of bulk, specialty and performance chemicals.

OUR PRODUCT

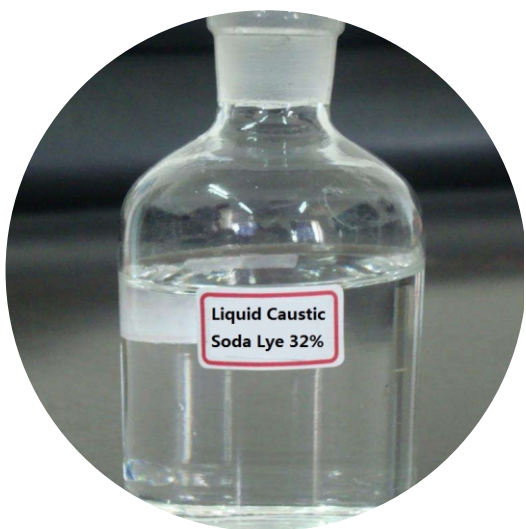

PRODUCT LIST

CAUSTIC SODA FLAKES

Caustic soda flakes is a solid form of sodium hydroxide. Caustic soda flakes manufactured by GACL. are free from foreign matter, dirt or other visible impurities. The product is widely used in the textile, soaps and detergents, pulp and paper industries and in alumina refineries.

CAUSTIC SODA LYE

Caustic Soda Lye is a highly caustic base and alkali that decomposes proteins at ordinary ambient temperatures and may cause severe chemical burns. It is highly soluble in water, and readily absorbs moisture and carbon dioxide from the air.

CAUSTIC SODA PRILLS

Caustic Soda Prills (Sodium hydroxide) are solid small fused white pearls, color- and odorless and very hygroscopic. The product is free of anti-caking and flow agents and offers significant advantages to conventional granules or flakes.

PRODUCT LIST

CAUSTIC SODA FLAKES

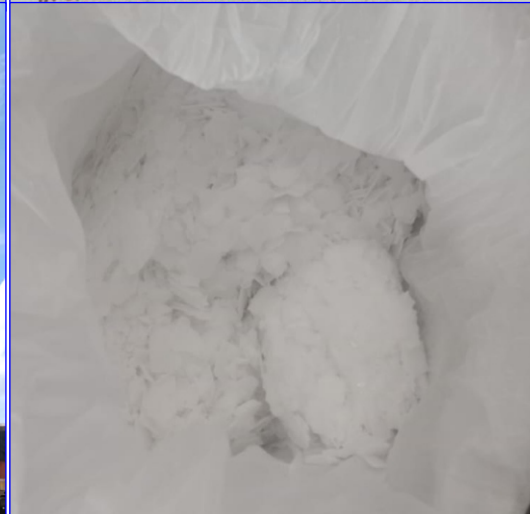

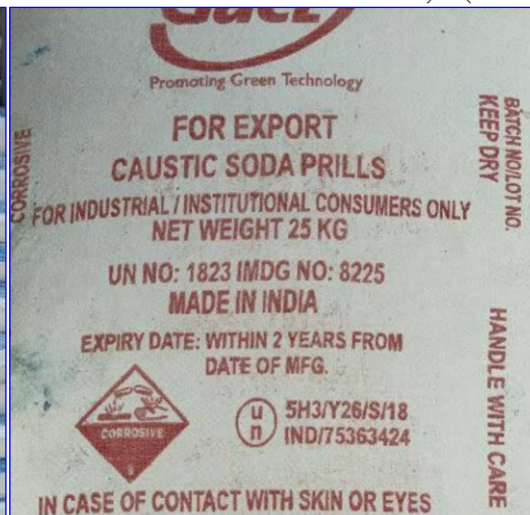

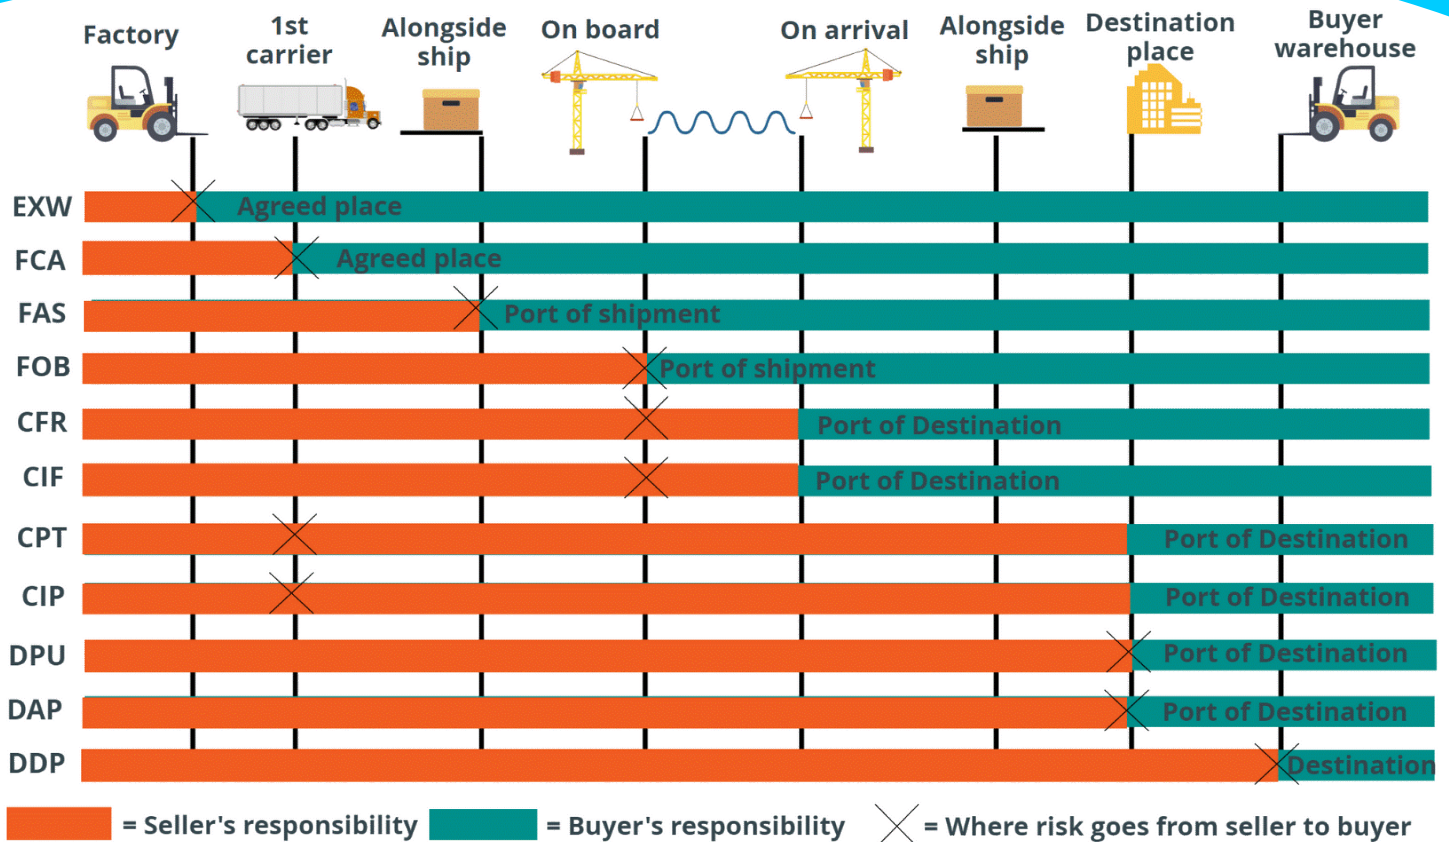

Caustic soda flakes is a solid form of sodium hydroxide. Caustic soda flakes manufactured by ADITYA BIRLA. are free from foreign matter, dirt or other visible impurities. The product is widely used in the textile, soaps and detergents, pulp and paper industries and in alumina refineries.

CAUSTIC SODA LYE

Caustic Soda Lye is a highly caustic base and alkali that decomposes proteins at ordinary ambient temperatures and may cause severe chemical burns. It is highly soluble in water, and readily absorbs moisture and carbon dioxide from the air.
